Summary

Enthusiastic and dedicated individual, fueled by a strong passion for software development with background in healthcare, actively seeks hands-on opportunities to contribute and grow within a dynamic team of professionals. As a full-stack developer, I bring a comprehensive skill set to the table. Possessing a solid grasp of front-end and backend development concepts, I am eager to delve into challenging projects that allow me to apply and expand my skills.

Skills

- Javascript
- Java
- React
- Springboot
- HTML
- CSS
- .NetTypeScript
- C#
- Node
- Express
- MySQL
- NoSQL
- MongoDB
- Restful API
- GIT
- CLI
- Frontend
- Backend

Experience

Self | Columbus , Ohio

Project: E-commerce Website

01/2023 - Current

- Developed an e-commerce website using Node.js/Express for the backend and React.js and Tailwind CSS for the frontend.
- Built out comprehensive frontend components to provide a user-friendly interface.
 - Planned to implement essential features such as a product catalog, shopping cart, and checkout process to streamline the shopping experience.
- Planned to integrate a secure payment gateway using the Stripe API to facilitate smooth and secure online transactions, prioritizing the safety of user payment information.
- Planned to utilize MySQL database for efficient storage and retrieval of product information and user data, ensuring seamless data management.
- Planned to implement responsive design principles to guarantee an optimal user experience across various devices, enhancing accessibility and usability.

Self | Columbus, OH

Project: Real Estate Website

01/2024 - 02/2024

- Designed and developed a dynamic real estate website using React for front-end interactivity, Node.js for server-side logic, and MongoDB for database management.
- Implemented responsive UI components with Tailwind CSS to create a modern and intuitive user interface, enhancing usability and engagement across various devices.

- Integrated advanced search features and filtering options using JavaScript, allowing users to efficiently browse properties based on criteria such as location,
- Developed user registration and login functionalities.
- Integrated a user-friendly interface for message submission, ensuring seamless communication between users and website administrators. Implemented backend functionality to store and manage user messages securely in the MongoDB database, enhancing user engagement and facilitating effective communication on the real estate website.

The Ohio State University Medical Center |
Columbus, Ohio

Ultrasound Technologist

06/2012 - 03/2020

- Provided high-quality patient care and imaging through 8 years of experience in the Radiology Department
- Collaborated with interdisciplinary medical teams to ensure accurate and timely diagnostic results
- Employed state-of-the-art ultrasound equipment and techniques to capture detailed images
- Applied problem-solving skills to address technical challenges and optimize imaging processes.

Education and Training

Color Coded Labs | Columbus, Ohio

Full-Stack Software Developer Certification

09/2023

The Ohio State University | Columbus, Ohio

Bachelor of Science in Allied Health (Radiology Sciences)

06/2012
